What is your school's vision (i.e., a picture of the "preferred future";
a statement that describes how the future will look if the district fulfills its mission.)
How is your school's vision focused on advancing equity?

Our vision at H.A. Brown Elementary School is that all students can achieve academic growth. At H.A. Brown, this will be an ongoing process that is based upon collaboration and feedback from assessments. Student achievement will be sustained in the quality of professional development practice, which will be modified and monitored in order to provide the best education possible for every student. We will communicate and collaborate with all school stakeholders including students, parents, teachers, and community partners. The instructional program will support creativity, problem-solving abilities, and technological awareness so that we prepare students to be competitive in today's economy. It is our goal to develop their 21st century skills in order to enhance the abilities of our students to be successful in society. We prepare our students with the skills necessary to be successful in high school while providing the necessary foundation to be college-bound and career-ready.
